### Notes on Ordering your Map

We recommend not using the '800' number for your hotel reservations as the '800' answering service may not know of your local arrangements.

Your final map date should be 5 to 8 days before you are intending to mail unless it's a rush order. Surprising to most clients, printing and mailing of your maps to you can happen within 12 - 48 hours of your final approval.

The first proof date should be 20 to 30 days before the final map date unless this is a rush order. The first proof date is an estimate and may slide a bit if last minute rush requests are received.

Paper color: Most wedding invitation themes are either White or Ivory (off-white, ecru, creme, etc.). We stock several whites and ivories. We also offer a wonderful Vellum at an additional charge. Vellum is a translucent, thick onionskin look, that you probably have seen while reviewing invitation samples. It is very classy and goes with any color invitation theme. Some find it more difficult to read than opaque papers.

Most maps are custom sized to 1/8 inch smaller in each direction than the invitation. This provides a complimentary look and feel with the invitation while not allowing the map to be the dominant item when the envelope is opened. The basic sized map is 8 1/2 by 5 1/2, a half of a standard sheet of typewriter paper, and is normally folded.

We recommend that you call weddingmaps.com after you have completed your Information Summary and Icon Selections before mailing. We can then discuss your thoughts to assure we personally understand your wedding event.

If you are calling the weddingmaps.com voice mail system, please press '1' at any time to bypass the options and leave a message. Our fax number is 763.559.1196.
